Pivot Table Web Application

CIS 497—Senior Project—Fall 2021

Project Description

This project is to develop a web based pivot table application using ASP.NET framework, C#, and HTML. This web application will allow users to select from different types of data to produce a report of the desired data.

Project Client:

Michael Ryan
President

Mimi Perkins
Director of Administration

CostFlex
Healthcare Decision Support Software

Cole Rawden
Programmer

Keith Parker
Director of Operations

Team: QuadSquad

Andrea Altobelli
IT—Digital Forensics
When I graduate, I will be attending graduate school at South for Information Systems. After, I plan on perusing a career as a Systems Analyst or Administrator.

Jacoby Lacey
IT—Networking
When I am not in school, I enjoy traveling and helping people in my community.

Sydnee Cotter
IT—Networking
I love being around my friends and spending time with my family. I have a passion for Apple and their products and I plan to work towards my end goal of working for Apple one day after graduation.

Jaylin Hollis
IT—Digital Forensics
Technology became my passion at a young age and my grandfather influenced me. I hope to continue to peruse my passion in Cybersecurity as a Security Analyst as well as study other facts about computing.
