ISC 568: IS Enterprise Integration

This course focuses on the back-end development of information systems. Students will build upon prior knowledge from ISC 507 Database Processing and ISC 559 IS App Design-Implementation to create a functional enterprise system to support business needs.

Prerequisites: ISC 507: IS Database Processing and ISC 559: IS App Design-Implementation and Programming Concepts.

CANNOT be registered for ISC 567 and ISC 568 in the same semester.
